Subject: RE: Presentation of the Animas River Catchment Water Modeling Results

Hi Dave,

Rob may be interested in participating in these discussions.

Dan,

Is there anyone from USGS that should be invited to the catchment basin modeling presentation?

Dave – Dan Wall may have already mentioned this, but USGS has conducted extensive modeling on the Upper Animas going down into the canyon. We may want to include them in this discussion. If so, Dan can provide the contacts.

Thanks,
Steve

Subject: Presentation of the Animas River Catchment Water Modeling Results

Henry will be ready by Friday to present the modeling results. Dave – in addition to the above, please provide e-mail address for those in the ICP that would like to attend the presentation. Henry will use CYSCO data sharing software for the presentation, and needs the addresses in order to send everyone the required links. Also – probably a good idea to have the GIS person there at the Gold King HQ sit in. Once I have the addresses, I'll forward to Henry and he'll set up the presentation. Please call if you have any questions.
